        <h3>From Concept to Field — Building Production Technology for West Africa</h3>
        <p>
          I am an independent Petroleum Engineering Technologist with a singular mission: to
solve the production

```

challenges that keep Niger Delta marginal fields from reaching their full potential. My work spans the entire production optimization stack — from downhole mechanical solutions to surface gas-lift systems,

AI-native artificial lift platforms, and autonomous reservoir intelligence probes.

My innovations are designed specifically for the mature, marginal, and stranded assets that dominate

the West African landscape. Each technology is field-realistic, cost-conscious, and engineered for

indigenous fabrication and deployment.

Niger Delta Survivor (downhole) + ND-GLO (surface) + ND-Amahor (AI) + ND-RIP (intelligence) + 5A Loop (autonomy)

Five provisional patents filed. Full non-convention Nigerian patent filings in progress with multiple law firms.

Seeking 482 TSS employer sponsorship for FIFO drilling/production operations in Australia (WA/QLD).
